

LeTin Skill Development Centre

The skill development centre will produce the LED lightings and solar based lighting solutions based on the training attained by the student. The training will be offered by M/S LUTRON lightings, Muvattupuzha for about a week in designing and implementing the LED bulbs and tubes with standard power ratings. They are expected to share the technical know-how of solar based illumination to students for domestic applications. The students, after attending the technical training started to assemble various products including LED bulbs, decorating Christmas stars etc.

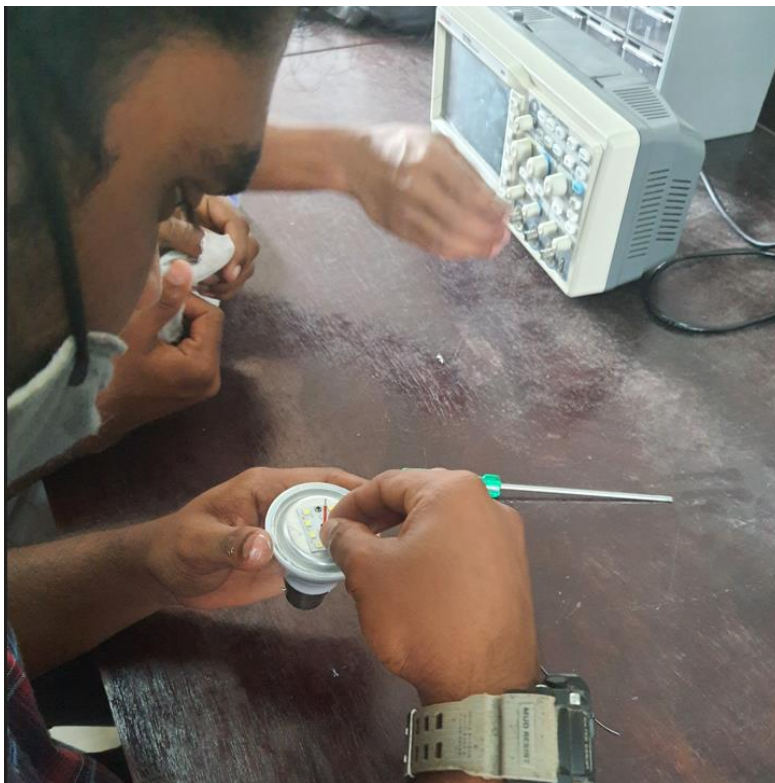

Technical Talk by Sri. Shibu P L, CEO Lutron Technologies, Ernakulam
